

Mobile application

ABOUT APPLICATION

Cybase Mobile App provides its users with an excellent tool to manage their business. It is designed to cater all your need at your fingertips.

BUSINESS DIRECTORY

CYBASE Provide a directory of all registered companies in the UAE. Companies can be sorted based on their activities, and you can contact them directly through the app.

UTILITIES

CYBASE features a multitude of utilities to make your life easier

VOIP CALL

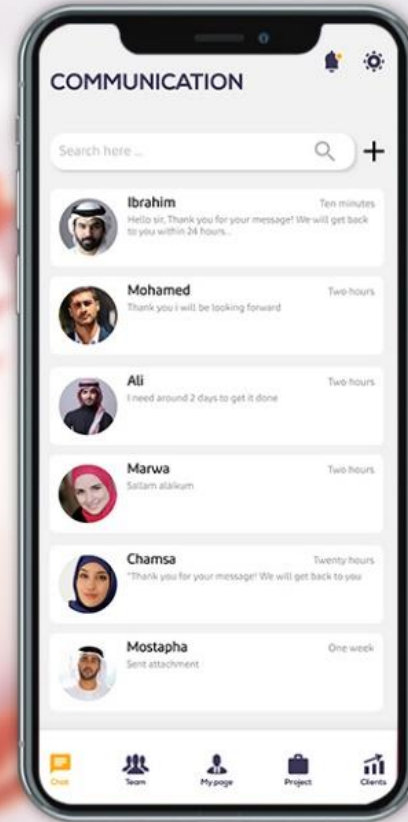

If you need to contact your employees or clients via VOIP, you can enable this feature. unknown printer took a galley of type and scrambled it to make

COMMUNICATION

Inside Project
(with All project members)

Project issues
(With the members who assigned to solve project issues)

General Communication
(One to one)

Creating Group

Against task
(One to one or one to many)

The advantage of CYBASE Chat is that all communication data are stored in a private database. Any employee who leaves the company has no access to the communication data (Voice notes, images, files etc.) CYBASE provides regular intervals for data backup.

TEAM

CYBASE provides you quick access to your team and offers several features that is accessible according to the authority line such as:

You can assign a task to them (by voice or text) and follow it.

You can communicate with them (voice, files, text etc)

You can check what the staff is currently engaged in. (status check)

You check sales pipeline (if he/she is in sales division.)

You can check what the employees accomplished on daily basis

TEAM works on hierarchy basis and follows strict lines of authority and reporting relationship. A staff member cannot communicate with someone who is more than one level superior. The rights are acquired according to one's position.

PROJECTS

Creating and managing projects is a breeze with CYBASE. Cybase enables you to create projects with modules that include the following features.

01
